With its emphasis on quality, an exceptional record of creating shareholder value, and one of the most robust growth profiles in the industry, Agnico-Eagle Mines Limited has emerged as the gold stock of choice.

### Corporate Strategy

Strategy remains focused on increasing cash flow per share

#### Increase gold production

- Targeting 2010 gold production of 1.0 million to 1.1 million oz
- Optimization and material expansion expected to contribute to steady production growth through 2015

#### Grow gold reserves

- Record gold reserves of 18.4 million oz
- On a per share basis, up almost five times over the past 11 years

#### Acquire small, think big

- Focus on early-stage projects where value can be created for AEM's shareholders

#### Be a low-cost leader

- Steady-state mines have achieved very good cost performance
- Production costs expected to remain below industry average are long term

#### Maintain a solid financial profile

- Available liquidity of approximately \$860 million
- Increasing net free cash flow

- LaRonde mine won its fifth consecutive provincial mine rescue championship
- Named Nunavut Mining Company of the Year at the 2009 Nunavut Mining Symposium
- Manitou-Goldex Rehabilitation Project: Established program with the Quebec government to rehabilitate an orphaned acid-generating tailings site using neutralizing tailings from Goldex
- AEM is the first foreign mining company to have received ESR certification as a socially responsible company from the Centro Mexicano para la Filantropía

### Forward-Looking Statements

The information in this document has been prepared as at April 29, 2010. Certain statements contained in this document constitute "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information under the provisions of Canadian provincial securities laws. When used in this document, the words "anticipate", "expect", "estimate", "forecast", "will", "planned", and similar expressions are intended to identify forward-looking statements or information.

Such statements include without limitation: statements regarding timing and amounts of capital expenditures and other assumptions; estimates of future reserves, resources, mineral production and sales; estimates of mine life; estimates of future internal rates of return, mining costs, cash costs, minesite costs and other expenses; estimates of future capital expenditures and other cash needs, and expectations as to the funding thereof; statements and information as to the projected development of certain ore deposits, including estimates of exploration, development and production and other capital costs, and estimates of the timing of such exploration, development and production or decisions with respect to such exploration, development and production; estimates of reserves and resources, and statements and information regarding anticipated future exploration; the anticipated timing of events with respect to the Company's minesites and statements and information regarding the sufficiency of the Company's cash resources. Such statements and information reflect the Company's views as at the date of this document and are subject to certain risks, uncertainties and assumptions, and undue reliance should not be placed on such statements and information. Many factors, known and unknown, could cause the actual results to be materially different from those expressed or implied by such forward-looking statements and information. Such risks include, but are not limited to: the volatility of prices of gold and other metals; uncertainty of mineral reserves, mineral resources, mineral grades and mineral recovery estimates; uncertainty of future production, capital expenditures, and other costs; currency fluctuations; financing of additional capital requirements; cost of exploration and development programs; mining risks; community protests; risks associated with foreign operations; governmental and environmental regulation; the volatility of the Company's stock price; and risks associated with the Company's byproduct metal derivative strategies. For a more detailed discussion of such risks and other factors that may affect the Company's ability to achieve the expectations set forth in the forward-looking statements contained in this document, see the Company's Annual Report on Form 20-F for the year ended December 31, 2008, as well as the Company's other filings with the Canadian Securities Administrators and the U.S. Securities and Exchange Commission. The Company does not intend, and does not assume any obligation, to update these forward-looking statements and information. Marc Legault, a Qualified Person and the Company's Vice-President, Project Development, reviewed the technical information disclosed herein. For a detailed breakdown of the Company's reserve and resource position see the February 17, 2010 press release on the Company's website. That press release also lists the Qualified Persons for each project.
